Top Five Contractors Receiving the Largest Dollar Volume of Prime Contract Awards in Each State

Fiscal Year 1983

Issued Annually by

Department of Defense
Washington Headquarters Services
Directorate for Information
Operations and Reports

FOREWORD

This report is published annually by the Office of the Secretary of Defense, Washington Headquarters Services, Directorate for Information Operations and Reports (WHS/DIOR). It contains summary data on the five contractors in each state that received the largest dollar volume of Department of Defense (DOD) prime contract awards over $25,000 during the fiscal year.

The report is approved for public release at cost; distribution unlimited. Requests for additional copies should be addressed to the Director for Information Operations and Reports, Washington Headquarters Services, The Pentagon, Room 1C535, Washington, D.C. 20301. (When ordering, cite publication number P18.)

INTRODUCTION

This report presents Fiscal Year (FY) 1983 data on the five contractors in each state that receive the largest dollar volume of Department of Defense (DOD) prime contract awards over $25,000. The data presented for each state include: the net value of DOD awards to all contractors in the state, the net value of DOD awards to each of the top five contractors in the state, and the percentage of the total awards within each state represented by the five contractors.

Data for each contractor include the contractor's name, the total net value of awards to the contractor, and a brief description of the major products and/or services provided by the contractor.

A summary table has also been provided (see page 2) which shows the net value and percent distribution of all DOD prime contract awards over $25,000, by state, for FY 1983.

NOTES ON COVERAGE

Data in this report reflect the net value of debit and credit procurement actions over $25,000, i.e., terminations, price changes, or other downward adjustments are deducted from a contractor's total award amount, while modifications and other positive adjustments are treated as increases. Procurement actions include definitive contracts; the obligated portions of letter contracts; and job orders, task orders, delivery orders, or any other orders against existing contracts. Contracts for research and development, services, construction, and supplies and equipment are included. Contracts awarded by DOD to other Government agencies as intragovernmental orders and foreign military sales (reimbursable sales to foreign governments) are included in this report.

The data base from which information for this report is collected does not include data on those parts of indefinite quantity contracts that have not been translated into specific orders to businesses, those contracts that have not yet become mutually binding agreements between the Government and the contractor, or prime contracts awarded by other U.S. government agencies and financed with DOD funds.

Contract work is not necessarily performed in the state where the contract is awarded. Most manufacturing contracts have been attributed to the contractor's location where the product will be processed and assembled. When contract work has been performed at more than one plant, the contract has been attributed to the location where the largest dollar amount of work was produced. Both construction and service contracts have been attributed to the state where the work is to be performed. Contracts for transportation and communications services have been attributed to the state where the contractor's home office is located. For purchase from wholesale or other distribution firms, the location is the contractor's business address.
